Non-Insulated  
Terminals

FREE POUCH  
for Storage

Built-In  
Pocket  
Contains  
Handy  
Terminal  
Assortment

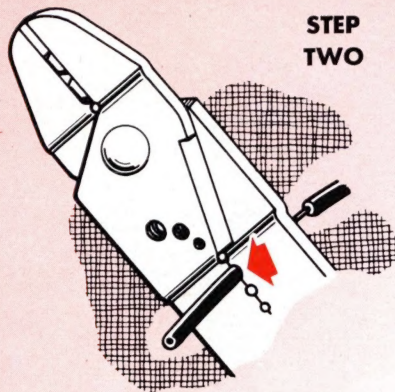

## 3 Easy Steps To Make Perfect Connections In Only Seconds

**STEP  
ONE**

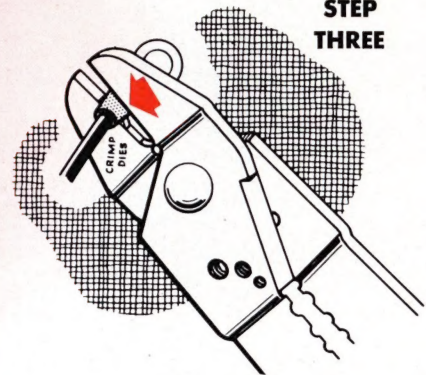

Cut wire to desired length. New advanced design puts wire cutter at the tip of the tool to facilitate cutting in cramped quarters.

**STEP  
TWO**

Strip insulation from wire (barrel length of terminal) by inserting in proper hole according to wire gauge size . . . squeeze and pull.

**STEP  
THREE**

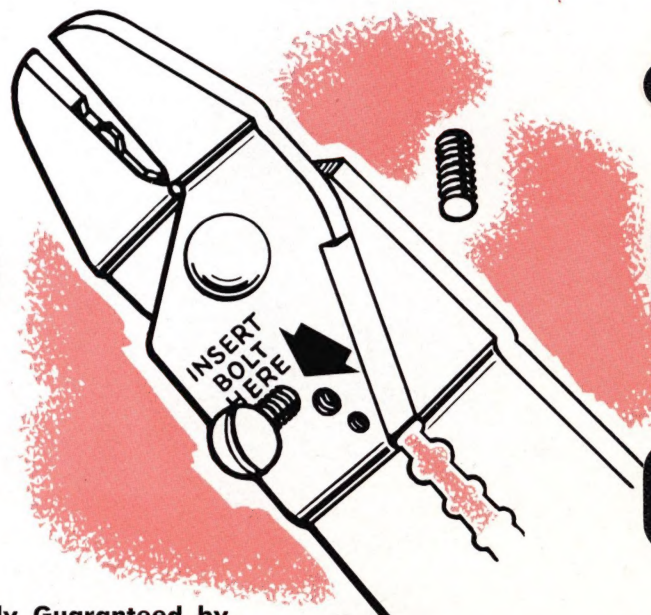

Place terminal in proper crimping nest . . . insert wire into barrel and crimp. No. 1963 tool is designed for use on either insulated or non-insulated style terminals.

plus

**Patented, Advanced Design**

## **BOLT SLICING FEATURE**

Vaco's continued engineering and research has developed this superior tool. Actual tests have proved new bolt slicing principle permits less hand pressure to do the job. Screw bolt into proper size threaded hole to desired length and squeeze. Cleanly slices 6 sizes of bolts with no burrs to file.
